For Immediate Release:

Fire Hydrant Flushing and Testing

On October 22, 2018 through November 9, 2018, the Taos Fire Department will begin the annual testing and flushing of all fire hydrants within the Town of Taos limits and through the fire district to include El Prado, Canon, Talpa, Llano Quemando and Ranchos de Taos. Crews will be working through the next few weeks until completed. This testing will ensure that hydrants have the proper pressure and flow of water needed during an emergency. The Town's Public Works Department will oversee any necessary repairs.

Updates will be provided as the work progresses.
